## Brief

As a part of the history and almost 70 years past, people still remember the image that en clips lay down in foxhole, the noise of "Ping" sound, and the smell of 30-06 rounds.

All these combined with courage, honor and discipline had created stories to share. All of these stories build up a role model to follow.

From WWII, Korea to Vietnam, The war has changed, but the spirits are never fade away.

A Legend that ICS shouldn't miss, The M1 Garand.

## Nylon Fiber Piston

The new piston body is made of Nylon fiber filler reinforcement and now the standard on every ICS AEG for delivering better performance and better service life. The cylinder head of 8 orifices enhances air suction and discharge, and thus the piston runs smoothly and agilely. Consequently in air compressing, it gives less stress to the spring, piston, gears, and motor; whereas in air releasing, the O-ring expands to make better air-sealing and to deliver more powerful firing rate.

## Low Resistance Switch Assembly And Mini Fuse

AEGs are powered by electricity; therefore, it's very important to design and setup a low current resistance operating environment for AEGs. ICS deploys new conductor material on switch plate to eliminate the resistance which caused by heat. Also the trigger contact switch is made hollow and robust of enhanced heat dissipation configuration. The new low resistance switch assembly provides the best efficiency. We also takes new 16AWG wire and new Mini fuse on ICS products. All contact points are nickel plated and also the mini fuse to lower the electric resistance. The electric current is much stable and produces less heat. In short, with all of these enhancements, ICS assures the AEGs perform at low electric resistance, spark free, and extended service life.

All internal wire is upgrade to 16 AWG Teflon wire, it withstands a rating voltage of 300V, temperature 200°C, resistance 15.6 ohm/km and 17.0 AMR capacitance, and is the highest quality standard applied in the AEG industry.

## Specifications(Standard)

### ICS-202 M1 GARAND

Weight: 3600g

Full Length: 1102mm

Barrel Length: 537mm

Inner Barrel Length: 610mm

Muzzle Velocity: 120m/s (390fps  $\pm$  15)

Motor: TURBO 3000(Short Pin)

Spring: M120

Battery: MC-130 (9.6V, 3300mAh)

Pellet Capacity: 42 rounds 6mm BBs

Main Material: Wooden/Metal/Engineering Plastic

1. Battery type recommended, not included.
2. For different requirements and regulations in various market and area, the specifications may be revised on demand, and the AEG actually fetched shall prevail.
